SECTION 4: First aid measures

Description of first aid measures

General information

In case of allergic reactions, specially at respiratory tract, seek medical treatment immediately. In case of stronger and long effects, specially on skin and respiratory tract, medical treatment is necessary.

In case of inhalation

In the event of symptoms refer for medical treatment.

In case of skin contact Consult a doctor if skin irritation persists.

In case of eye contact

In case of contact with eyes rinse with plenty of water carefully. In the event of persistent symptoms seek medical treatment.

Most important symptoms and effects, both acute and delayed Physician's information / possible symptoms Allergic symptoms

Indication of any immediate medical attention and special treatment needed Treatment (Advice to doctor)

Treat symptoms.

SECTION 5: Firefighting measures

Extinguishing media Suitable extinguishing media Alcohol-resistant foam ABC powder Carbon dioxide Water spray jet

Extinguishing media which must not be used for safety reasons Full water jet

Special hazards arising from the substance or mixture

In the event of fire the following can be released: Carbon monoxide (CO) Carbon dioxide (CO2)

Advice for firefighters Special protective equipment for fire-fighters Use breathing apparatus with independent air supply (isolated). Do not inhale explosion and/or combustion gases.

Additional information

Cool endangered containers with water spray jet. Shown danger refers to the contents of the cans standing under pressure. Above 50 °C danger of burst under emission of atmosphere capable of explosion. Bring out containers from fire area. Collect contaminated firefighting water separately, must not be discharged into the drains.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures Ensure adequate ventilation. Keep people away and stay on the upwind side. Keep away sources of ignition.

Pay attention to extension of gas especially at ground (heavier than air) and in direction of the wind.

Environmental precautions

Collect contaminated water / firefighting water separately. Do not discharge into the drains/surface waters/groundwater.

Methods and material for containment and cleaning up Take up with absorbent material (e.g. general-purpose binder). Additional Information Vapour can be explosive in the mixture with air.

SECTION 7: Handling and storage

Precautions for safe handling

Advice on safe handling

No special measures necessary if used correctly.

Advice on protection against fire and explosion

Keep away from sources of ignition - No smoking Emergency cooling must be provided for the eventuality of a fire in the vicinity. Vapours can form an explosive mixture with air. The vapours of product are heavier than air. Formation of explosive gas mixtures in air. Pay attention to general rules of internal fire prevention. Avoid effect of heat.

Conditions for safe storage, including any incompatibilities
